

1       **ABSTRACT**

2       A data protection portion includes the file system alteration checking  
3       portion. One aspect of the file system alteration checking portion relates to a  
4       media including game content and a data protection portion. In one version,  
5       the data protection portion protects the game content from modification by  
6       determining whether the game content has been modified. If the game  
7       content has been modified, then the installation of the game content within  
8       the apparatus fails. A data protection portion includes the file system  
9       alteration checking portion.
